JAS Holdings Garment Solution Plc. is established and owned by a local, motivated and experienced female entrepreneur with a 2% share of her own Son, aiming to play a role in the industrial transformation effort of the Ethiopian government. The Company is founded to produce garment accessories and packaging materials and supply to the garment and textile industry.

The Company is located in Hawassa Industrial Park, which is located in the Southern part of the Country. Exportation being our main objectives, we participate in the investment areas that are given high priority by the Ethiopian Government. We aimed to have a significant role over effect in which it will contribute greatly to the acceleration of growth in the textile and garment industries, as well as the industrial sector in general. JAS is fully committed to sustainability and socio-environmental development. Since its creation, it has followed a strict code of ethics, and intends to maintain its principles in all business operations.

Our Mission

With a strong dedication to quality production and sustainability, the company's mission encompasses the following:

- ✚ To be a manufacturer, that follows excellent quality management process, and provides cost-efficient products.
- ✚ To build a brand in the local and international textile markets.
- ✚ To create local jobs and play a role in Ethiopia's economic development: In addition to the job opportunities within JAS, this project will have a vertical linkage with the garment accessories sub-sector, eventually reinforcing the creation of new jobs.
- ✚ To attract further textile investors/buyers in Ethiopia through quality and price.

Our Vision

We are established to accomplish our vision, which only few are listed below:

- ✚ JAS' quest is to be trusted by and satisfy all of its Customers, Employees, Community, etc.
- ✚ JAS shall push towards world-class excellence in its People, Products, Processes, and Performance.
- ✚ JAS is in pursuit of consistent growth to lead in the international and domestic markets, and intensify its international presence through research, innovation and development.
- ✚ While preserving the focal point on primary goals, JAS will always be aware of, and responsive to ensure strong ethical and moral compliance.

This Production Capacity will be tripled when we start working in Three Shifts (24 hr.), which will be very soon.

We have also installed a security Camera / CCTV system in the factory (inside & outside the premises), which helps the management to follow up and control all the activities happening in the premises by being anywhere using the internet facility.

Why we are located in Hawassa:

- Hawassa is one of the fast growing cities in the Country, which is located 275 km to the south from the Capital city of the Country as well as Africa.
- The city is the first in attracting tourism with its geographical structure and beauty of the landscape as well as the presence of the Hawassa Lake and mostly because of its cultural diversity.
- Hawassa Industrial Park is the first and the biggest industrial park in the country with its state-of-the art design and up-to date infrastructure, undistracted electric power, treated water as well as internet connection. It is the first preferred city for many international companies to invest and currently more than 20 foreign garment and textile companies are operating in the park.
- In addition, with the availability of air transport, Hawassa is only 200 km far from the dry port Mojo and around 1000 km from Djibouti port. It has also a dedicated dry port and customs clearance facility in the park. The Express road will also be ready very soon, which will add a lot to the transportation efficiency.

JAS Holdings Garment Solution Plc is currently operating in one shed with a total area of 5,500 m2 and supplying its product to different international companies who are involved in the export sector. We are also working strongly to be a trustful supplier and mostly we are creating an international business network to involve into direct export to different countries across the globe. We are working to expand our factory and have an additional shed in order to increase our production capacity as well as to add other product types.
